KIDS

Saint-Petersburg

For Kids

Interactive excursion “Feel yourself a Firefighter”. *Duration 1,5 hrs. *Child age from 2 years old.

We will meet with the real fire fighters, who will gladly introduce us to the structure of the fire departments of St. Petersburg, fire engines, the training ground of the Ministry of Emergency Situations and the most heroic profession - the Fireman.

Your child could:

- sit behind the wheel of a real fire truck;
- see how a fire extinguisher works in practice;
- explore what equipment firefighters use to fight with the fire and smoke and to save people;
- we will visit the plane, sit at the helm;
- see the ship, train and helicopter;
- try on helmets and uniforms of firefighters.

This excursion is a great possibility to get new knowledge:

- how and where alarm calls are received;
- what is the speed of response and features of the departure of firefighters to an alarm;
- what are the standards for the speed of putting on uniform clothing;
- we will find out what safety rules should be taken into account when using pyrotechnics, sparklers, garlands and what to do if something goes wrong;

*If the weather is bad outside, in order to warm up and take a break, the program includes a visit to a classroom and watching a short film about the work of the Ministry of Emergencies.

Cartoon creating Master class “Visiting Smeshariki”. Without transportation.

*Duration 1 hour 15 min. *Child age from 5 years old.

An unforgettable adventure for children and adults!

We will find ourselves on the other side of the cartoon, learn the history, stages and all the subtleties of the work of the animator. And we will also create our own series of the world-famous cartoon about round animals!

An interactive program awaits you, in which young guests will be told about all the stages of creating an animated picture, from creating characters with a unique character, ending with a script, animation and directing.

Children will be able to understand the complex process and get acquainted with the work of multipliers.. The guests, together with the guide, go on a trip to the Computer Animation Studio "Petersburg", where they make the animated series, popular in Russia, about round animals.

There are a lot of interesting things for both children and adults: a huge collection of toys, an exhibition of unique paintings "Smeshariki in World Painting". Visitors will see the jobs of those people who make cartoons for them.

As a gift each participant will have professional photographs and a cartoon of their own production!

National show-museum “Grand Maket of Russia”.

* Duration 1 hour 15 min. *Child age from 3 years old.

The exposition of the museum is the largest model of Russia in the world with an area of 800 square meters, which is an artistic embodiment of the image of the country: from its Far Eastern borders to the "amber" coast of the Baltic Sea. Dozens of various specialists have been working on its creation around the clock for five years. On the model surface, collective images of various cities and regions are conveyed, and in genre scenes virtually all types of human activity are displayed.

The dynamics of the composition is added by the railway and car traffic, various scenes with moving objects and figures are controlled by the audience. More than 200 trains pass along ingenious routes with a total length of almost two and a half thousand meters, and turn the model into a solid living organism. And the car system, using the electromagnetic induction for the first time in the world in model building, as a power source for cars, will not leave any visitor indifferent. Dozens of various cars will surprise you with the complexity and originality of their movement, while the headlights, brake lights and turning lights add brightness to the model and illuminate the roads at night!

Every fifteen minutes, from east to west, night falls over the model, to simulate which almost 800,000 LEDs are involved. The sea of lights makes the experience of the visitor really unforgettable!

Russian railway museum. Without transportation.

* Duration 1 hour 15 min. *Child age from 5 years old.

Museum complex is Russia’s main railway museum and is among the world’s largest railway museums. We opened on October 30, 2017.

The museum complex is spread over a vast area. It has two buildings — an old locomotive depot building and an eye-catching modern building. The buildings are connected with a suspension bridge to make a single structure.

Museum tours include visiting a collection of rare and legendary steam trains, locomotives, electric locomotives, railcars and other rolling stock.

This museum is a venue where adults and children alike will gain a lot of knowledge about the history of railways and rail transport, railway jobs, modern and outdated technologies, and, at the same time, we trust the museum will become an inviting amusement park and a favorite attraction for the whole family.
